Subject: Public comments re: clean water guidelines

Hello, and thanks for giving me the opportunity to offer input on this issue.

I'm not very savvy nor do I have a detailed knowledge of these laws, so I'm not really qualified to have anything very elaborate to say.

With that, my comment/thought is, if bringing the current Clean Water Act in-line with the Supreme Court ruling means putting our waters in greater jeopardy, I would like the EPA to re-visit the Clean Water Act and make any necessary corrections so these waters would continue being protected. This is what is the most important to me.

I can only imagine how complex these laws are, and what a challenge it must be to write things like the Clean Water Act. I appreciate these efforts, and again appreciate the opportunity to comment on this issue.

Best Regards,

Bob McPhail
